SUMMARY

I'm a **Tech Lead** with strong full-stack experience, focused on building scalable, high-quality applications and guiding teams toward technical excellence. I specialize in designing scalable architectures and infrastructure development, making key technical decisions, mentoring developers, and ensuring smooth end-to-end delivery.

WORK EXPERIENCE

Team Leader at X-Byte

Jan 2022 - Present

- Lead teams in building scalable systems with clean architecture, strong infrastructure, and reliable full-stack engineering.
- Led a high-level project involving the integration of multiple APIs and backend services.
- Headed the R&D team to explore new technologies and optimize workflows.
- Built and maintained web scraping scripts for data collection and automation tasks.

Support Executive at Specific Step

Feb 2019 - Dec 2021

- Monitored nationwide recharge transactions to ensure smooth operations and issue resolution.
- Acted as MIS executive, generating daily, weekly, and monthly performance and operational reports.
- Utilized Excel and advanced MS Excel tools (pivot tables, VLOOKUP, charts) for data analysis and reporting.

Customer Care Executive at Aegis Limited

Jun 2018 - Jan 2018

- Handled inbound customer calls, resolving queries and providing prompt assistance.
 - Enhanced communication and interpersonal skills through daily client interactions
-
